

EARLY YEARS FOUNDATION STAGE

Our inclusive, active workshops provide cross-curricular opportunities and are designed to enrich children's learning experiences. Created in line with National Curriculum objectives, they can support your classroom teaching, launch your topic or simply provide a fun day out!

Close Encounters (Visual Only)

A unique opportunity to get closer than any other visitor to some of our incredible reptiles and invertebrates. Touch and feel a range of artefacts as we learn more about these incredibly special animals.

This session links well to learning across a range of National Curriculum areas, so please let us know the objective of your visit and we can tailor our discussions to meet your needs.

Please note, to help ensure animal welfare, we no longer allow our animals to be held or touched by visitors. However, there will be opportunities to touch and feel the artefacts used within this session.

Animals Around Us

Inspire your class to get creative through this unique hands-on workshop helping them to explore the natural world and discover the animals that call it home. Touch and feel a variety of artefacts and observe our animals to empower your class to design their very own brand-new animal.

Storytelling

Immerse yourselves in a unique storytelling experience with the opportunity to discover the characters from the story in real life around our zoo. Choose one of three different stories to cater to the needs of your class. Our chosen stories build an understanding of the natural world as well as bringing in literacy and wellbeing in an immersive environment.
