OUTREACH

Let the wonder of the zoo come to you with our Outreach packages. The workshops are designed to be easily tailored to fit with your class objectives whilst allowing students freedom to discover the natural world through the use of artefacts and invertebrates*. Why not combine with our Discovery Plus package for a whole topic experience!

Wildlife Detectives

Turn your class into Wildlife Detectives!

With this hands-on, interactive workshop, your class will have the opportunity to investigate a range of artefacts, debate the conservation conundrums and dive deeper into the world of Dartmoor Zoo.

We will set groups a series of challenges to solve the animal mystery, all of which can be tailored to meet your specific objective.
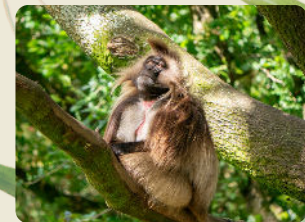

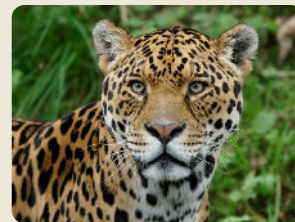

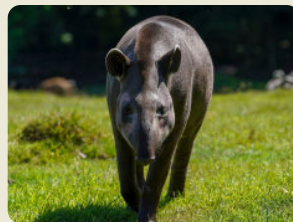

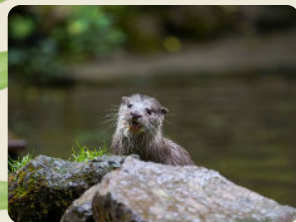

This session is designed to excite and inspire with imagination and proactive learning.

Close Encounters

A unique opportunity to get closer to some of our incredible invertebrates and get hands on with a range of artefacts as we learn more about these incredibly special animals.

This session links well to learning across a range of subject areas, so please let us know the objective for our visit to you and we can tailor our discussions to meet your needs.

Please note, to help ensure animal welfare, we are only able to bring invertebrates on outreach. These animals will be a visual only experience.

OUTREACH CONTINUED...
